

Innovative Infection Control Solutions for Healthcare Type A & Type B Wash Areas

GPURE® SMARTEC PLUS Wall Mounted Touch Free Electronic Tap with STERISAN® Basins

Providing your facilities with a fit-for-purpose hygienic solution by reducing cross-infection, aerosol, and splashing during handwash or elbow scrub applications.

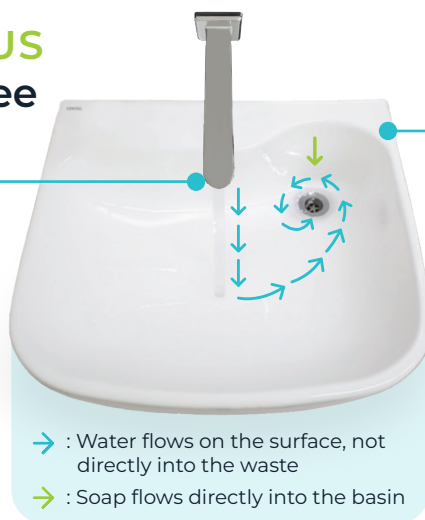

The GPURE® SMARTEC PLUS laser sensor tap prevents nuisance triggering with its laser sensor and eliminates legionella growth in your end-of-line tapware, all with hygienic laminar flow swivel aerators.

The latest patented GENTEC innovation comes in the form of our basins, which are designed with offset waste, NANO glazing surfaces and a removable and cleanable One-Way Valve.

This package of basin, tap, and One-Way Valve basin waste will provide you with the best possible outcome for any handwash application and eliminate any cross-infection risk for your facilities.

GPURE® SMARTEC PLUS Wall Mounted Touch Free Electronic Tap

- ✓ Stainless Steel ZERO* Lead
- ✓ Smooth waterways
- ✓ Water & energy savings

STERISAN® Basins with Rear Offset Waste

- ✓ Reducing airborne bacteria
- ✓ One-Way Valve drain waste
- ✓ NANO glazing
- ✓ Protect hands against bacteria and biofilm build-up in your waste

Specifically Designed to Suit your Healthcare Applications

Compatible Handsfree Selections for Healthcare

PLUS2500BM
GPURE® SMARTEC PLUS Wall Mounted
Electronic Tap with Laser Sensor and Battery & Mains Power

- Stainless Steel ZERO* Lead
- The advanced laser sensor technology provides precision and consistency with variable programming. This avoids nuisance triggering and activates on all skin tones
- Polished finish
- Hygiene flush programming minimises the risk of Legionella from infrequently used fixtures
- All waterways are smooth bored for improved infection control

Matching Handsfree Tapware with your Clinical Type A and Type B Basins

610B
STERISAN® Wall Mounted
610mm Type A Clinical
Scrub Basin with NANO
Glazing and Offset Waste

560B
STERISAN® Wall Mounted
560mm Type B Clinical
Basin with NANO Glazing
and Offset Waste

- Specifically designed with a rear offset waste to prevent aerosols created from water being directed into the waste fitting, thus reducing airborne bacteria
- Sloped surfaces in the bowl area to drain water effectively to rear offset waste
- NANO glazing
- Protects hands against bacteria and biofilm from basin waste
- Soap overflow will drop straight into the drain
