

Health & Aged Care Solutions: Sanitary Ware with Infection Control Technology for Type A, Type B & Ensuites

STERISAN® Ensuite Basins - Accomplish 5 Key Criteria in Infection Control

- ✓ Specifically designed with a rear offset waste to prevent aerosols created from water being directed into the waste fitting, thus reducing airborne bacteria
- ✓ Sloped surfaces in the bowl area to drain water effectively to rear offset waste
- ✓ NANO glazing
- ✓ Soap overflow will drop straight into the drain
- ✓ Hygienic hand wash method

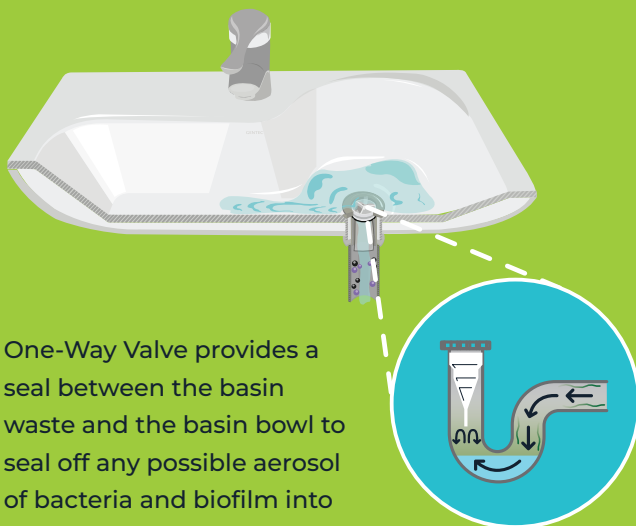

One-Way Valve — an Innovative Solution for Eliminating Bacteria, Odours and Vermin from Basin Waste

Why One-Way Valve?

GENTEC's One-Way Valve offers a unique drainage solution that stands out from other products on the market. Its flexible, single-piece units are easy to install and require minimal maintenance, making it a convenient option for customers.

Additionally, this range can be coupled and retrofitted with any of our existing 316 Stainless Steel 32mm/40mm basin waste without any disruption to the surrounding waste area.

One-Way Valve features a one-way valve that allows water to flow freely, while preventing the escape of pathogens, odours, and vermin from the sewage and waste system into habitable zones.

One-Way Valve provides a seal between the basin waste and the basin bowl to seal off any possible aerosol of bacteria and biofilm into the hand wash area

Unique Features and Benefits

- Protects basins from airborne bacteria, sewer gas odours and insects
- Allows water to flow freely
- Easy to install
- Easily access the basin outlet piping for maintenance (cleaning & clearing)
- No ridges or braces to obstruct or catch waste
- Air tight seal to prevent any odour from escaping
- WaterMark approved
