

HYGIENIC. DURABLE. RELIABLE.

GPURE® FLOSTOP Stainless Steel Hands-Free Foot Operated / Pedal Valve

Hands-Free Hygiene Without the Complexity.
Built for Commercial Kitchens and Hands-Free Wash Basins.

Hands-free water control designed for hygiene-critical environments.

The GPURE® FLOSTOP Stainless Steel Foot Operated / Pedal Valve provides a simple and reliable way to operate water flow without touching the tap or valve with your hands.

Designed for food service, commercial, healthcare and other high-use environments, the foot-operated system helps minimise unnecessary touch points and supports improved hand hygiene and infection-control practices.

Key Benefits

- ✓ **100% hands-free operation** — Activate water flow using your foot.
- ✓ **Improved hygiene** — Minimises hand contact with tapware and helps reduce potential cross-contamination.
- ✓ **Stainless steel construction** — Durable, corrosion-resistant and easy to clean.
- ✓ **No electrical power required** — Simple mechanical operation without batteries or mains power.
- ✓ **Reliable water control** — Precise spring action On/Off mechanism provides convenient control of water flow.
- ✓ **Easy to clean** — Smooth stainless-steel surfaces help support effective cleaning and maintenance.
- ✓ **Low maintenance** — Robust mechanical design.
- ✓ **Designed for long service life** — Ideal for environments where durability and reliability are essential.
- ✓ **Built for demanding environments** — Suitable for high-use commercial and institutional applications.

GPURE® FLOSTOP Stainless Steel Hands-Free Foot Operated / Pedal Valve

GPT3600

Stainless Steel Floor Mounted 15mm Male (G 1/2" BSP) Foot Operated / Pedal Valve

GPT3600KIT — Standard kit comes with Lead Free Brass Basin Spout (**SLF1000**)
(Optional Stainless Steel Basin Spout (**GPS1000**) available on request)

Ideal For

- ✓ **Food & Hospitality**
Commercial kitchens, food preparation areas, restaurants and food-processing facilities.
- ✓ **Commercial & Public Facilities**
Schools, aged-care facilities, laboratories, workshops, factories and public amenities.
- ✓ **Healthcare & Medical Facilities**
Hospitals, medical centres, clinics, treatment areas and other hygiene-sensitive environments.

Why Hands-Free?

Common hand-operated taps require the user to touch the tap before and / or after washing their hands. A foot-operated / pedal valve eliminates this unnecessary contact point.

Step on. Water flows. Release. Water stops.

A simple solution that promotes better hygiene while providing dependable everyday operation.

Technical Information

Material:

Stainless Steel 304

Cartridge:

Timed Flow (Hydraulic)

Cartridge Size:

15mm

Inlet:

15mm Male (G 1/2" BSP)

Outlet:

15mm Male (G 1/2" BSP)

Run Time:

On/Off

Working Pressure:

150kPa - 500kPa

Manufacturers Recommended Pressure:

350kPa

Working Temperature:

Min. 5°C - Max. 50°C

Finish:

Satin
