Sanitary Ware - Hand Basins, WC and Accessories

Accessible Basin with Offset Waste (Type C)

Engineered for performance in demanding environments, GENTEC's Sanitary Ware range is tailored for use in healthcare, commercial, and industrial settings. These robust, low-maintenance products are designed to withstand high traffic while offering flexibility through customisable configurations to suit a wide range of applications.

At the forefront of the range is the **STERISAN® Basin**, featuring a **rear offset waste** to reduce the risk of airborne bacteria by minimising aerosol generation. Its sloped bowl design and NANO glazing further enhance hygiene and water drainage.

Paired with the **One-Way Valve**, which forms a protective barrier between the waste and basin bowl, the system helps prevent bacterial and biofilm aerosols from entering the handwash area. Together, they deliver a trusted solution for infection control and long-term performance.

Clinical Basin with Offset Waste (Type A & B)

Basin Shrouds

Basin Waste with One-Way Valve

Close Coupled Toilet Suite

In-Wall Toilet Suite
